Cannous Cannous Pirc-Safety

College students living away from home should take a few minutes to make sure they are living in a fire-safe environment. Educating students on what they can do to stay safe during the school year is important and often overlooked.

SAFETY TIPS

- Make sure you can hear the building alarm system when you are in your dorm room.
- If you live in a dormitory, make sure your sleeping room has a smoke alarm, or your dormitory suite has a smoke alarm in each living area as well as the sleeping room. For the best protection, all smoke alarms in the dormitory suite should be interconnected so that when one sounds, they all sound.
- If you live in an apartment or house, make sure smoke alarms are installed in each sleeping room, outside every sleeping area, and on each level of the apartment unit or house. For the best protection, all smoke alarms in the apartment unit or house should be interconnected so that when one sounds, they all sound.
-))) Test all smoke alarms at least monthly.
- >>> Never remove batteries or disable the alarm.
- If you live off campus, have a fire escape plan with two ways out of every room.
- >>>> When the smoke alarm or fire alarm sounds, get out of the building quickly and stay out.
- >>>> Stay in the kitchen when cooking.
- >>> Cook only when you are alert, not sleepy or drowsy from medicine or alcohol.

FACTS

- Fires are more common during the evening hours, between 5–11 pm, and on weekends.
- Cooking equipment is the cause of about threequarters of fires, and most fires begin in a kitchen or cooking area.
